

PO for Job Quote pricing

1. When sending in a PO with job quote pricing you MUST put a comment line below each product that is on a job quote. If you do not put it below each line the person keying the order will only apply the discount to the one line it is below and not the whole order. In the near future HPM will be able to read these comment lines from décor and we will no longer have to fax the PO to them.
